PROJECTS

E-Commerce Website (ReactJS) [Github Demo](#)

- Developed a dynamic e-commerce application using ReactJS with API integration for fetching product data.
- Implemented global state management using Redux Toolkit, replacing React Context API for improved scalability.
- Utilized Redux Toolkit to handle user authentication and cart functionality, ensuring efficient and maintainable code.
- Utilized React Router for smooth page navigation and Tailwind CSS for responsive UI design.

Food Website (HTML, CSS, JavaScript) [Github Demo](#)

- Developed an interactive food website with a user-friendly shopping cart.
- Ensured responsive design for seamless viewing and cart use across devices.
- Optimized performance and cross-browser compatibility for a smooth user experience.

Quote Generator (HTML, CSS, JavaScript) [Github Demo](#)

- Designed a user-friendly interface for displaying and generating quotes.
- Implemented functionality to fetch random quotes using JavaScript and an external API.
- Integrated user interaction elements (e.g., buttons) to trigger quote generation.
